WORK EXPERIENCE

Commure Mountain View, CA
Software Engineer July 2026 – present

- Owned end-to-end development of a provider credentialing management product handling 600k+ records per major site (XXm total), simplifying frequent updates to complex credentialing data and supporting customer migration from Waystar to Commure
- Integrated user-defined credentialing data and rules across RCM automations and EHR workflows, enabling automated claim holds and submission, credentialing-aware scheduling, and chart-note signing to address revenue loss problem worth $XXm/year at major customer sites

Software Engineer Intern June 2025 – August 2025

- Assisted in multiple site launches (>$1 million ARR contracts) by designing and developing an SFTP-based document export process, allowing these major sites to post their own remits while taking advantage of our submission pipeline
- Built support for both inpatient and dental claims to be submitted through our system, expanding our market reach and supporting multiple business-critical strategic site launches in the future
- Reduced number of revenue-blocking tickets related to fee schedules by 75% by revamping billed amount calculations

Humana Louisville, KY
Software Engineer Intern May 2024 – December 2024

- Reduced heavy database query times by average ~20% by writing reusable stale data cleanup process
- Migrated all Epost microservices to Azure key vault credential storage with zero service downtime

Querry-Simpson Institute for Bioelectronics Chicago, IL
Research Assistant October 2022 – August 2023

- Tailored UX of dysphagia analysis datakit to end users (medical researchers) with sophisticated Rust error handling
- Reduced datakit visualization time by ~30% through data pre-processing prior to feeding into Matplotlib

Delta Lab Evanston, IL
Research Assistant January 2025 – June 2025

- Developed chat-based graph interface to measure LLM ability to break out of design fixation and generate novel trains of thought
- Created evaluation set to test model performance using this tool and proved measurables improvements as new models were released by frontier labs

EDUCATION

Northwestern University Evanston, IL
Master of Science (MS) in Computer Science August 2026
Bachelor of Science (BS) in Computer Science, Minor in Global Health Studies December 2025

ADDITIONAL

Languages: Python, Javascript/Typescript, SQL
Backend & Infrastructure: FastAPI, Postgres, GCP, REST APIs
