EDUCATION

Northwestern University

Bachelor of Science

Major in Computer Science; Minor in Global Health Studies

Cumulative GPA: 3.78/4.00

Relevant Coursework: Cloud Software, Algorithm Design, Cybersecurity, Human-Computer Interactions, Computer Networks, Machine Learning, Computer Networking

Evanston, IL

Expected December 2025

WORK EXPERIENCE

Humana

Incoming Software Engineer Intern

BDS team

Louisville, KY

Starting May 2025

Humana

Software Engineer Intern

Louisville, KY

May 2024 – December 2024

- Created process to quickly sync developer database changes to the archive database
- Automated dynamic generation of queries to purge records from all tables in a database's hierarchy
- Developed reusable pipeline to programmatically archive and purge the database with these two scripts given a set of parameters, improving efficiency of developer database queries by up to 20%
- Set up an Azure Key Vault, connected microservices in Spring Boot to pull credentials from the key vault
- Improved the security of Epost microservices through abstraction of service credentials

Querry-Simpson Institute for Bioelectronics

Software Engineer Intern

Chicago, IL

October 2022 – August 2023

- Worked on bioinformatic signal processing tools spanning across multiple projects, e.g. dysphagia therapy analysis
- Debugged and improved error messages in PPG sensor analysis and visualization data kit
- Optimized memory usage and runtime of data visualization using Python's Matplotlib library

PROJECTS

LiftAnalyzer

Scrape a user's Apple Watch workouts, categorize them and train personalized predictive models for biometrics

Tools: Swift, SwiftUI, HealthKit, CreateML, TestFlight

MedScribe AI

User uploads a patient-physician MP3 interaction, generate a SOAP note and ICD codes based on semantic similarities

Tools: Flask, Pinecone, React

WikiTok-Focused

Open-source contribution to WikiTok, tailor the topics presented to users' choices

Tools: TypeScript, MediaWiki API

ACTIVITIES

Delta Lab

Research Intern

Evanston, IL

January 2025 – Present

- Contributed to research focused on LLM-assisted brainstorming
- Developed full-stack tools to assist designers overcome design fixation using LLMs

Northwestern University Computer Science Department

Undergraduate TA (Scalable Software Architectures, Foundations of Security)

Evanston, IL

September 2024 – Present

- Prepared content including cloud services, SQL scripting, full-stack design, security vulnerabilities, etc.
- Held regular office hours to assist students with homework assignments

South Asian Students' Alliance

Fundraising Chair

Evanston, IL

January 2023 – March 2025

- Acquired funding of over \$50,000 through community and university fundraisers
- Assisted in planning and handling events such as Holi, SASA Show, SASA Formal, etc.

ADDITIONAL

Technical Skills: C, C++, Python, JavaScript, PyTorch/Tensorflow, React, Git, Swift, Rust, SQL, MATLAB, x86_64 Assembly, REST APIs, AWS (EC2, Lambda, S3, RDS), Agile, Spring Boot
