EDUCATION

Northwestern University

Bachelor of Science

Evanston, IL

Expected December 2025

Major in Computer Science; Minor in Global Health Studies

Cumulative GPA: 3.78/4.00

Relevant Coursework: Cloud Software, Algorithm Design, Cybersecurity, Human-Computer Interactions, Computer Networks, Machine Learning, Computer Networking

WORK EXPERIENCE

Delta Lab

Research Intern

Evanston, IL

January 2025-present

- Developed prototype that assists designers of context-aware features alleviate design fixation
- Given some complex human experience, programmatically use LLMs to break the experience into machine-understandable context expressions (built using React and ChatGPT API)
- Determined through user studies and rapid prototyping the extent to which an LLM should be used in this process

Humana

Louisville, KY

Backend Software Engineer Intern

May 2024 – December 2024

- Created process to quickly sync developer database changes to the archive database
- Automated dynamic generation of queries to purge records from all tables in a database's hierarchy
- Developed reusable pipeline to programmatically archive and purge the database with these two scripts given a set of parameters, improving efficiency of developer database queries by up to 20%
- Set up an Azure Key Vault, connected microservices in Spring Boot to pull credentials from the key vault
- Improved the security of Epost microservices through abstraction of service credentials

Querry-Simpson Institute for Bioelectronics

Chicago, IL

Software Engineer Intern

October 2022 – August 2023

- Worked on bioinformatic signal processing tools spanning across multiple projects, e.g. dysphagia therapy analysis
- Debugged and improved error messages in PPG sensor analysis and visualization data kit
- Optimized memory usage and runtime of data visualization using Python's Matplotlib library

PROJECTS

LiftAnalyzer

- Analyze a user's recorded strength training based on workout split
- Provide ML workout predictions based on users previous personalized health data
- Tools: Swift, SwiftUI, HealthKit, CreateML, TestFlight

WikiTok-Focused

- Open-source contribution to WikiTok, tailor the topics presented to users' choices
- Tools: TypeScript, MediaWiki API

Traffic Sign Classifier

- Serverless CNN classifies user-uploaded traffic signs into predefined buckets
- Tools: PyTorch, Flask, Next.js

ACTIVITIES

Northwestern University Computer Science Department

Evanston, IL

Undergraduate TA (Scalable Software Architectures, Foundations of Security)

September 2024 – Present

- Prepared content including cloud services, SQL scripting, full-stack design, security vulnerabilities, etc.
- Held regular office hours to assist students with homework assignments

South Asian Students' Alliance

Evanston, IL

Fundraising Chair

March 2023 – Present

- Acquired funding of over \$50,000 through community and university fundraisers
- Assisted in planning and handling events such as Holi, SASA Show, SASA Formal, etc.

ADDITIONAL

Technical Skills: C, C++, Python, JavaScript, PyTorch/Tensorflow, React, Git, Swift, Rust, SQL, MATLAB, x86_64 Assembly, REST APIs, AWS (EC2, Lambda, S3, RDS), Agile, Spring Boot
