EDUCATION

Northwestern University

Master of Science (MS) in Computer Science

Evanston, IL

January 2026 - August 2026

Northwestern University

Bachelor of Science (BS)

Evanston, IL

December 2025

Major in Computer Science; Minor in Global Health Studies

Cumulative GPA: 3.78/4.00

Relevant Coursework: Cloud Software, Algorithm Design, Cybersecurity, Human-Computer Interactions, Computer Networks, Machine Learning, Computer Networking

WORK EXPERIENCE

Commure

Mountain View, CA

Software Engineer Intern

June 2025 – present

- Improved document customization and visibility to 5+ major clients by designing and developing a scalable document ingestion, transformation, and exposure pipeline
- Built support for both inpatient and dental claims to be submitted through our system, allowing for successful launches netting >\$5 million ARR
- Reduced number of revenue-blocking tickets related to fee schedules by 75% by revamping error handling and data integrity

Humana

Louisville, KY

Software Engineer Intern

May 2024 – December 2024

- Reduced Epost database SQL query times by ~20% by deploying quick and reusable data archival and purging processes
- Designed strong microservice security by writing Spring Boot APIs to pull necessary credentials from secure Azure key vault

Querry-Simpson Institute for Bioelectronics

Chicago, IL

Software Engineer Intern

October 2022 – August 2023

- Tailored UX of dysphagia analysis datakit to end users (medical researchers) with sophisticated Rust error handling
- Reduced datakit visualization time by ~30% through data pre-processing prior to feeding into Matplotlib

PROJECTS

[LiftAnalyzer](#)

Scrape a user's Apple Watch workouts, categorize them and train personalized predictive models for biometrics

Tools: *Swift, SwiftUI, HealthKit, CreateML, TestFlight*

[MedScribe AI](#)

User uploads a patient-physician MP3 interaction, generate a SOAP note and ICD codes based on semantic similarities

Tools: *Flask, Pinecone, React*

[CleanRepo](#)

Node.js CLI tool (published on npm) that removes previously merged and stale branches from a local and remote Git repository

Tools: *Node.js, Git*

ACTIVITIES

Delta Lab

Evanston, IL

Research Intern

January 2025 – Present

- Contributed to research focused on LLM-assisted brainstorming
- Developed full-stack tools to assist designers overcome design fixation using LLMs

Northwestern University Computer Science Department

Evanston, IL

Undergraduate TA (Scalable Software Architectures, Foundations of Security)

September 2024 – Present

- Prepared and graded content including cloud services, SQL scripting, full-stack design, security vulnerabilities, etc.
- Held regular office hours to assist students with homework assignments

South Asian Students' Alliance

Evanston, IL

Fundraising Chair

January 2023 – March 2025

- Acquired funding of over \$50,000 through community and university fundraisers
- Assisted in planning and handling events such as Holi, SASA Show, SASA Formal, etc.

ADDITIONAL

Technical Skills: C, C++, Python, JavaScript, TypeScript, PyTorch, Tensorflow, React, Git, Swift, Rust, SQL, MATLAB, x86_64 Assembly, REST APIs, AWS (EC2, Lambda, S3, RDS), Agile, Spring Boot
